THOMSON REUTERS

ABOUT CORTELLIS COMPANY DETAILED PIPELINE REPORT

Thomson Reuters provides the knowledge, tools, and expertise to help support drug discovery and development activities, IP portfolio optimization, identification of licensing and partnering opportunities, delivery of successful regulatory submissions, and the ability to keep current with the rapidly-changing pharmaceutical and chemical markets, supporting informed, early decisions.

This report was created by Thomson Reuters, using information from *Thomson Reuters Cortellis™ for Competitive Intelligence*; a comprehensive, proven intelligence solution that leverages the most accurate, complete, and widely respected drug pipeline information.From drug discovery and development activities to patent reports, the latest deals, and partnering opportunities, *Cortellis* can provide the confidence to make the most informed business decisions, faster. *Cortellis for Competitive Intelligence* provides accurateand validated information on pharmaceutical and biotechnology companies globally, their drug pipelines, deals, patents, and clinical trials, plus breaking industry news and conference coverage. All contained in one simple, highly intuitive research platform.

Cortellis Company Detailed Pipeline reports are the second in a series of that track pharmaceutical and biotechnology companies worldwide. All *Cortellis for Competitive Intelligence* content is subject to the most comprehensive editorial review process available, conducted by scientists, pharma professionals, regulatory experts, and generics specialists. Featuring timely drug pipeline information expertly uncovered and integrated from over 400 global meetings each year, you'll always be on top of the latest developments.

Chosen by leading life sciences companies, their executives and investors, *Cortellis for Competitive Intelligence* accelerates your deal-making and gives you timely insights on the development landscape.

Discover undiscovered opportunities in drug development and licensing faster with *Thomson Reuters Cortellis™ for Competitive Intelligence*

DISCLAIMER

GLOSSARY

Number of Drugs in Active Development

Number of drugs associated with the company or subsidiary that are currently in active development, i.e. the development status for the drug(s) is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Number of Inactive Drugs

Number of drugs associated with the company or subsidiary that are currently classified as inactive, i.e. where the development status for the drug(s) is one of the following: No Development Reported, Discontinued, or Withdrawn.

Number of Patents as Owner

Number of patents associated with the company where the company is listed as owner; i.e. the relationship type (or way the patent refers to the company) is: Patent Assignee/Owner, Patent owner (not assignee), Licensee for development and marketing, Licensee – marketing only (Distributor), Patent assignee of family member, Inferred assignee.

Number of Patents as Third Party

Number of patents associated with the company where the company is listed as third party; i.e. the relationship type (or way the patent refers to the company) is: Patent assignee (not owner), Ex-Licensee for development and marketing, Ex-Licensee marketing only (Distributor), Customer of technology, Ex-Customer of technology, Patent opponent or infringer, Affiliate organization of inventor, Owner of underlying technology.

Patents summary table

This table represents a summary of the core patent coverage for this company covering Therapeutic EP, US and WO patents since 1990 only.

Number of Deals

A count of deals where the company or one of its subsidiaries is the primary company.

Key Indications

Displays top ten key indications for the company and its subsidiaries based on frequency (indications occurring with high and identical frequency are always included, and this may result in more than ten Key Indications being listed). Includes both indications associated with patents where the company is patent owner and indications associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Key Target-based Actions

Displays top ten key target-based actions for the company and its subsidiaries based on frequency (actions occurring with high and identical frequency are always included, and this may result in more than ten Key Target-based Actions being listed). Includes both target-based actions associated with patents where the company patent owner and target-based actions associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended. A target-based action is one that is associated with a target.

Key Technologies

Displays top ten key technologies for the company and its subsidiaries based on frequency (technologies occurring with high and identical frequency are always included, and this may result in more than ten Key Technologies being listed). Includes both key technologies associated with patents where the company relationship is patent owner and key technologies associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

COMPANY PROFILE

SUMMARY

BIND Therapeutics (previously BIND Biosciences Inc), founded in 2006, is a biopharmaceutical company specializing in the development of therapeutic targeted nanoparticles. In April 2013, BIND Biosciences changed its name to BIND Therapeutics.

LOCATION

The company is headquartered in Boston, MA. It also has a subsidiary office in Moscow region, Russia.

R&D GRANTS

In October 2007, the National Institutes of Standards and Technology awarded BIND a 3-year $2 million grant to further develop a high-throughput platform for its targeted nanoparticle technology.

Also in October 2007, the NCI awarded BIND a 6-month, $0.15 million Phase I SBIR grant to develop a targeted therapy for hormone refractory prostate cancer.

FINANCIAL

In December 2013, BIND was added to the Russell 2000, Russell 3000, Russell Global and Russell Microcap Indices.

In October 2013, the company raised $5.6 million when the underwriters exercised their option to purchase an additional 370,499 shares.

In August 2013, BIND filed a Form S-1 with the US SEC for a proposed IPO. In September 2013, BIND priced an IPO of 4.7 million common stock shares at $15.00 per share, with trading of the shares to begin on NASDAQ Global Select Market under ticker symbol 'BIND' on September 20, 2013. The underwriters were granted 30-day option to purchase up to 705,000 additional common stock shares; at that time, the offering was expected to close on September 25, 2013. In

Return to Table of Contents

September 2013, the offering was closed and the company raised the gross proceeds of $70.5 million.

In October 2011, BIND secured total proceeds of $47.25 million through a $22 million series D financing from RUSNANO and additional funding up to $25.25 million from its investors.

In June 2010, the company secured $12.4 million in a series C-1 financing.

In January 2010, the company secured $11 million in a series C financing.

In November 2007, BIND was to raise $16 million from a series B financing. The funding would be used to advance the company's preclinical pipeline to clinical trials.

EARLY R&D/TECHNOLOGY UPDATES

IND's Medicinal Nanoengineering platform aims to produce targeted nanoparticles with unprecedented control over drug properties to maximize trafficking to disease sites, leading to superior efficacy while minimizing toxicities.

By December 2007, BIND had been focusing on nanoparticles-targeting therapeutic for cancer, cardiovascular diseases and inflammatory diseases; in June 2010, the company planned to advance its second product into clinical development in 2011.

PRODUCT PORTFOLIO DRUG PIPELINE DETAIL

PLEASE NOTE: Highest status refers to highest development of that drug for one of the active companies

polymeric nanoparticle docetaxel (Accurin, solid tumors), BIND Therapeutics

polymeric nanoparticle docetaxel (Accurin, solid tumors), BIND Therapeutics SNAPSHOT

Drug Name	polymeric nanoparticle docetaxel (Accurin, solid tumors), BIND Therapeutics
Key Synonyms	
Originator Company	BIND Therapeutics Inc
Active Companies	BIND Therapeutics Inc
Inactive Companies	
Highest Status	Phase 2 Clinical
Active Indications	Non-small-cell lung cancer;Metastatic prostate cancer;Cancer
Target-based Actions	Glutamate carboxypeptidase II inhibitor;Prostate specific antigen modulator
Other Actions	Microtubule inhibitor;Cell cycle inhibitor
Technologies	Nanoparticle formulation injectable;Small molecule therapeutic;Intravenous formulation
Last Change Date	06-Nov-2013

polymeric nanoparticle docetaxel (Accurin, solid tumors), BIND Therapeutics DEVELOPMENT PROFILE

SUMMARY

BIND Therapeutics (previously BIND Biosciences) is developing an Accurin, BIND-014, an iv polymeric nanoparticle formulation containing docetaxel, which targets prostate-specific membrane antigen upregulated in solid tumors, developed using the company's Medicinal Nanoengineering platform, for the potential treatment of cancer, including NSCLC and prostate cancer,,. In April 2013, a phase II trial for NSCLC was initiated. By July 2013, a phase II trial for metastatic castrate resistant prostate cancer had been initiated. In June 2013, the company was planning to initiate phase II trials for bladder cancers in 2013.
