bluebird bio, Inc. (BLUE) — Overweight

LentiGlobin Data at EHA Shines Bright

CONCLUSION

Over the weekend at the EHA conference, BLUE reported data from two patients with beta-thalassemia treated with its LentiGlobin gene therapy product. Previously reported vector copy number (avg number of lentivirus vectors/cell) in these patients had left us optimistic these results would be good, and the clinical benefit in hemoglobin was substantially more impressive than we had expected. Our first impression is that these results not only solidify LentiGlobin prospects in beta-thal but also positions it attractively for the sickle cell indication which is also being pursued; so far we have only assumed modest contribution for the BT indication in our BLUE valuation. We'll look to get additional details during a conference call BLUE is hosting tomorrow morning at 8AM EST to discuss results. We reiterate our Overweight rating and expect shares to react favorably to this update.

- **That is cool stuff.** Two beta-thal patients were treated with BLUE's optimized lentivirus vector; both patients rapidly became transfusion independent. One had a total hemoglobin (Hb) of 10.1g/dL of which an impressive 6.6g/dL was from the corrected gene replacement while the other had a total Hb of 11.6g/dL of which 4.2g/dL was from the corrected gene replacement. The ability to create such a high degree of normalized Hb from gene therapy represents an impressive proof of concept for this platform and a potentially major step forward for this important unmet medical need.

- **Helps validate sickle too.** Both beta-thal and sickle cell anemia are genetic diseases affecting hemoglobin. Sickle cell crises are often treated or prophylaxed with blood transfusions, so the ability to correct so much Hb in the BT setting bodes well for an impactful correction not just of sickle cell patients dependent on transfusions to maintain Hb levels but also to prevent potentially catastrophic sickle crises.

- **Sets a high bar for the competition.** SGMO/BIIB plan to file an IND for their own gene therapy program for beta-thal by YE. Their approach differs in that instead of adding a normal globulin gene, Zn fingers are being used to knock out the Bcl11a promoter which is responsible for the switch from fetal hemoglobin to adult hemoglobin. Increasing fetal hemoglobin levels to replace the defective adult hemoglobin gene may represent a genetic engineering approach to treat these disorders without a genetic integration requirement. Whether one of these approaches will prove to be a 'winning' strategy remains to be seen; in the absence of a winner the market should be large enough to accommodate two sizable gene therapy products.

- **Lovin' this field.** We've spent a fair amount of time assessing the evolving gene therapy platform; yet another validating datapoint should be considered a positive for the field overall as well as BLUE.

COMPANY DESCRIPTION

BLUE is one of the pioneers in gene therapy.

PRICE: US$26.09
TARGET: US$34.00
DCF through 2022 using 11% disc rate, 8% terminal growth & 36x terminal multiple.

Piper Jaffray

			IB Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [OW]	355	61.95	87	24.51
HOLD [N]	203	35.43	21	10.34
SELL [UW]	15	2.62	0	0.00

Note: Distribution of Ratings/IB Services shows the number of companies currently in each rating category from which Piper Jaffray and its affiliates received compensation for investment banking services within the past 12 months. FINRA rules require disclosure of which ratings most closely correspond with "buy," "hold," and "sell" recommendations. Piper Jaffray ratings are not the equivalent of buy, hold or sell, but instead represent recommended relative weightings. Nevertheless, Overweight corresponds most closely with buy, Neutral with hold and Underweight with sell. See Stock Rating definitions below.

Analyst Certification — Joshua E. Schimmer, MD, Sr Research Analyst
— Kristina N. Cibor, Research Analyst

The views expressed in this report accurately reflect my personal views about the subject company and the subject security. In addition, no part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this report.

Research Disclosures

Piper Jaffray usually provides bids and offers for the securities of bluebird bio, Inc. and will, from time to time, buy and sell bluebird bio, Inc. securities on a principal basis.

Piper Jaffray research analysts receive compensation that is based, in part, on overall firm revenues, which include investment banking revenues.

Rating Definitions

Stock Ratings: Piper Jaffray ratings are indicators of expected total return (price appreciation plus dividend) within the next 12 months. At times analysts may specify a different investment horizon or may include additional investment time horizons for specific stocks. Stock performance is measured relative to the group of stocks covered by each analyst. Lists of the stocks covered by each are available at www.piperjaffray.com/researchdisclosures. Stock ratings and/or stock coverage may be suspended from time to time in the event that there is no active analyst opinion or analyst coverage, but the opinion or coverage is expected to resume. Research reports and ratings should not be relied upon as individual investment advice. As always, an investor's decision to buy or sell a security must depend on individual circumstances, including existing holdings, time horizons and risk tolerance. Piper Jaffray sales and trading personnel may provide written or oral commentary, trade ideas, or other information about a particular stock to clients or internal trading desks reflecting different opinions than those expressed by the research analyst. In addition, Piper Jaffray technical research products are based on different methodologies and may contradict the opinions contained in fundamental research reports.

- **Overweight (OW):** Anticipated to outperform relative to the median of the group of stocks covered by the analyst.
- **Neutral (N):** Anticipated to perform in line relative to the median of the group of stocks covered by the analyst.
- **Underweight (UW):** Anticipated to underperform relative to the median of the group of stocks covered by the analyst.

Other Important Information

The material regarding the subject company is based on data obtained from sources we deem to be reliable; it is not guaranteed as to accuracy and does not purport to be complete. This report is solely for informational purposes and is not intended to be used as the primary basis of investment decisions. Piper Jaffray has not assessed the suitability of the subject company for any person. Because of individual client requirements, it is not, and it should not be construed as, advice designed to meet the particular investment needs of any investor. This report is not an offer or the solicitation of an offer to sell or buy any security. Unless otherwise noted, the price of a security mentioned in this report is the market closing price as of the end of the prior business day. Piper Jaffray does not maintain a predetermined schedule for publication of research and will not necessarily update this report. Piper Jaffray policy generally prohibits research analysts from sending draft research reports to subject companies; however, it should be presumed that the analyst(s) who authored this report has had discussions with the subject company to ensure factual accuracy prior to publication, and has had assistance from the company in conducting diligence, including visits to company sites and meetings with company management and other representatives.

Notice to customers: This material is not directed to, or intended for distribution to or use by, any person or entity if Piper Jaffray is prohibited or restricted by any legislation or regulation in any jurisdiction from making it available to such person or entity. Customers in any of the jurisdictions where Piper Jaffray and its affiliates do business who wish to effect a transaction in the securities discussed in this report should contact their local Piper Jaffray representative. **Europe:** This material is for the use of intended recipients only and only for distribution to professional and institutional investors, i.e. persons who are authorised persons or exempted persons within the meaning of the Financial Services and Markets Act 2000 of the United Kingdom, or persons who have been categorised by Piper Jaffray Ltd. as professional clients under the rules of the Financial Conduct Authority. **United States:** This report is distributed in the United States by Piper Jaffray & Co., member SIPC, FINRA and NYSE, Inc., which accepts responsibility for its contents.
