Correction: Increasing Target on Stem Therapeutic Progress and Potential

Event

Corrects price target to \$15 in Valuation and Recommendation section. Fate Therapeutics has recently advanced several stem cell therapeutic candidates forward in development, led by optimized stem cell product PROHEMA in the phase 2 PUMA study, and has broadened its therapeutic focus to rare orphan disease and potential indications served by human-induced pluripotent stem cells (HiPSC). With initial focus on the PUMA study in patients undergoing stem cell transplant for hematologic malignancy, we expect initial interim efficacy/safety data by year-end 2014 following first patient enrollment in March and broadening to 10 centers from 8 centers previously planned. Expanded development of PROHEMA is also planned for pediatric use with IND filings expected in 1H14 for both pediatric hematologic malignancy and pediatric demyelinating lysosomal storage disorders like Hurler's Syndrome and Krabbe Disease. Additional progress has been made with proprietary Wnt7a protein analogs for muscle regeneration, with clinical assessment targeted for 2015. Finally, with recent publication validating potential therapeutic value of FATE's HiPSC platform, additional stem cell therapeutic candidates are expected to emerge.

Impact & Analysis

We are reiterating our Outperform rating on shares of FATE and increasing our price target to \$15, following a review of recent program progress. Broadening stem cell therapeutic pipeline is de-risking, in our view, to the extent that any individual product event is mitigated by other programs, and we see significant biologic rationale across key programs. With timelines for PROHEMA data accelerated to 2H14, there is now a clear near-term catalyst for FATE shares, with further upside potential on programs for Hurler's, Krabbe's and muscular dystrophy.

Valuation & Recommendation

We arrive at our \$15 price target by applying a 25x multiple to our 2020 EPS estimate of \$1.68 and discounting at 25%. We rate FATE shares at Outperform.
