COMPANY PROFILE

SUMMARY

Conatus was formed in July 2005 by the former management of Idun Pharmaceuticals following that company's acquisition by Pfizer. Conatus's R&D is centered on inflammation and liver disease.

FINANCIAL

In February 2011, Conatus closed a \$20 million series B preferred stock private placement financing and converted promissory bridge notes into series B preferred stock. In April 2011, Conatus closed a second tranche of the series B private placement financing raising \$7.5 million. The total capital raised was \$32.5 million.

In January 2007, Conatus completed the first \$5.5 million of its \$27.5 million preferred stock private placement financing. The company was to use the proceeds to develop a clinical stage hepatitis C virus drug candidate it licensed from Roche Holding, and to identify additional licensing opportunities. In May 2007, Conatus raised the final \$22 million in its \$27.5 million series A private placement. The closing was associated with the achievement of a preclinical CTS-1027 milestone.
